

Triangles

A triangle is a three-sided shape.

The first part of the word TRI angle means three.

Eg. A TRIKE is a bicycle with THREE wheels instead of two.

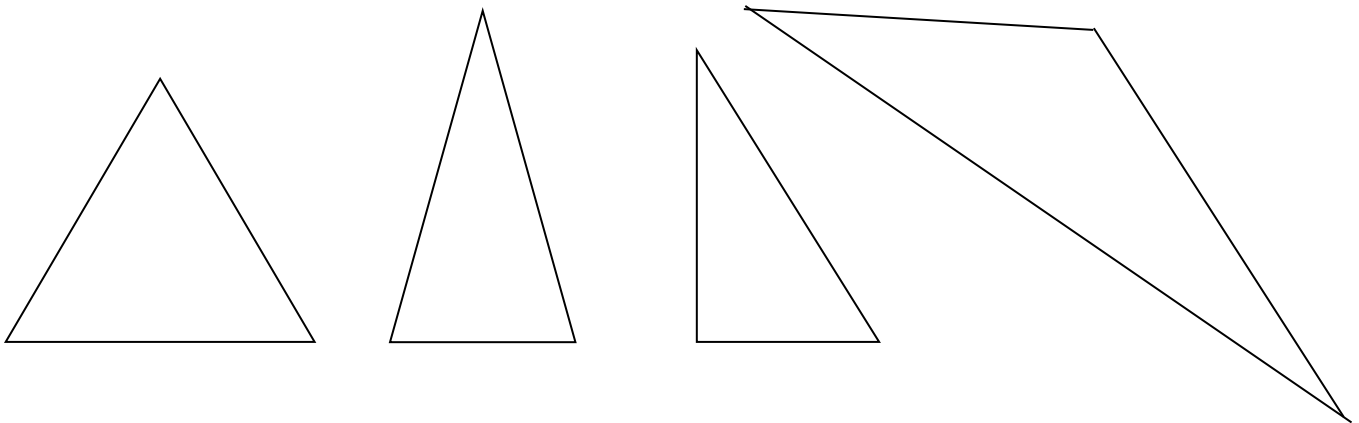

There are different types of TRIANGLE:

EQUILATERAL..... All sides same length, all angles equal

ISOSCELES Two sides same length, two angles equal

SCALENE All sides different lengths, all angles different

RIGHT ANGLE.....A triangle with one right angle (90°)

Right angle

Scalene

Isosceles

Equilateral

Colour each triangle to match the colour box for each name,
or draw a line from each triangle to its name.
